

K-LOVE @ 105.5 is my radio station of choice. I listen to this upon waking in the morning, all throughout my drive time and before falling asleep at night. If I could obtain this signal at my place of employment, I would listen there as well. It fills my soul, heart and mind with good news and music that never has to be censored. In these days of foul language and off color remarks, not to mention nudity and questionable programming on television, K-Love is a breath of fresh air to the smog infested radio waves of inequity. Having this type of programming helps the community to make a choice for their families to be able to listen to music which contributes rather than degenerates. It is therefore a given that we must have a choice in our listening schedule. Please reconsider the broadcast service of LPM, which would hurt the ability of this station and others like it to be heard and they NEED to be heard.

Thank you.
